FGV Continues to Record Improvements in Plantation Productivity

FGV Holdings Berhad continues its positive momentum as it recorded crop production improvements in April 2019 compared to the same period in 2018 on the back of its transformation plan that began in October last year. The Group produced a total of 382,548 MT of fresh fruit bunches (FFB) from its 23 regions, compared to 358,527 MT produced in the same period in 2018, an increase of 6.7%.

FGV crude palm oil (CPO) production increased by 11.6% to 267,436 MT, compared to 239,662 MT, while the production of palm kernel rose by 13.9% to 71,316 MT compared to 62,623 MT for the same period in 2018.

“I am pleased with FGV’s current operational performance and this is the result of the teamwork of all the staff especially in the estates and mills. I am confident that this momentum can continue throughout the year to record better performance results this year,” Dato’ Haris Fadzilah Hassan, FGV’s Group Chief Executive Officer said.
