KUALA LUMPUR, 25 September 2020: FGV Holding Berhad's subsidiary, FGV Prodata Systems Sdn Bhd (FGV Prodata), has secured a three-year hardware maintenance contract with the Ministry of Defense Malaysia (MinDef), proving its expertise as a homegrown Information and Communication Technology (ICT) service provider.

FGV Prodata Chief Executive Officer, Ali Mustafa said that the company is capable of being one of the leading ICT players in Malaysia, following the success of delivering IT outsourcing or managed services projects for government agencies and private sectors in Malaysia.

"This achievement is in line with FGV Group's transformation journey in expanding new growth areas to create more value. This is very important to us, as it proves FGV Prodata's

credibility in creating end-to-end components to build secure and cohesive systems for the ICT industry," said Ali Mustafa.

For this three-year contract starting September 2020, FGV Prodata services cover spare parts supply, preventive and corrective maintenance of up to 10,000 ICT equipment at nine locations in Selangor and Kuala Lumpur, as well as serving the top management and high ranking officials of MinDef.

FGV Prodata has been serving MinDef for more than 20 years by providing ICT equipment and maintenance services through several contracts.

Since its inception almost 50 years ago, FGV Prodata has been an integral part of bringing technology into FGV to support and drive operational excellence. Initially, most projects were targeted towards optimising FGV's palm oil supply chain.

In recent years, FGV Prodata has shown immense growth in diversifying its business portfolio by entering into new business areas and continuously moving forward to offer new trending technologies of IR 4.0 starting with Analytics, Automation, Cloud Computing, and Internet of Things services.
