REAFFIRMING FGV STAND ON SUSTAINABILITY COMMITMENT

Dear Valued Customer,

In the wake of a few negative reports and intense pressure that has been exerted by certain NGOs such as Greenpeace International, FGV would like to re-affirm our commitment to become a sustainable and responsible food producer, by advocating sustainable practices in our operations and across our supply chain. These pressure are tantamount to threats with the aim of smearing and discrediting the palm oil industry.

FGV stands firm in upholding social equity, creating economic betterment of our local communities and the protection of the environment. We have developed all our plantation in strict compliance with the necessary guidelines and legislation.

We have made steady progress in our sustainability journey including:

- ✓ 13 palm oil mills which have been RSPO certified to-date, with more in the pipeline
- ✓ Our commitment to restore all developed peat lands and forest areas in line with our 2017 Sustainability Policy, without causing social conflict.
- ✓ Providing workers' welfare in accordance to the laws and regulations.
- ✓ The Company has also adopted the NDPE policy, since August 2016.

We are fully aware of the work that still needs to be done to maintain all our stakeholders' confidence and will continue to engage all parties in an open and transparent manner.

We thank you for your continuous support and will update you on our sustainability progress from time to time. For more information please view our website at <http://www.feldaglobal.com/sustainability/stakeholder-engagement/sustainability-updates/>

Thank you,
