

# Delivering sustainable foods & agriproducts to the world

# About Us

**FGV Holdings Berhad is one of the world's largest producers of Crude Palm Oil (CPO), with an estimated output of 3 million metric tonnes (MT) per annum, accounting for about 15% of Malaysia's total annual production of CPO.**

Listed in Bursa Malaysia's Main Market, FGV operates in nine countries across Asia, North America and Europe. Our operations are primarily focused on four core business sectors; Plantation, Sugar, Integrated Farming and Logistics & Support Businesses which are supported by a workforce over 45,000 strong.

Our presence in the Plantation Sector can be found all across the value chain, as we are involved in Palm Upstream, Palm Downstream, Research & Development, Rubber, Trading and Renewable Energy.

In Malaysia and Indonesia, FGV manages a total landbank of 439,051 hectares and 67 palm oil mills to produce about 3 million MT per year.

Given FGV's historical role in Malaysia's agricultural evolution, two-thirds of the oils produced in our mills are from FELDA or schemed settlers and Independent Smallholders. Through this connection, we provide crucial support for smallholders by taking their output to the international market. Our position as an integrated palm oil producer with a significant presence in the downstream sector allows us to capture maximum value from our operations. Through refining and processing activities, FGV is able to reap the rewards as CPO and Palm Kernel (PK) transforms into value-added products such as cooking oil, margarine, shortening and oleochemicals.

FGV remains at the forefront of scientific research and new technology in the palm oil industry. Backed by over 40 years of experience in R&D, and one of the largest oil palm research centres located in Southeast Asia, we focus our efforts on increased yields, efficiency, reduced production costs, environmental sustainability and enhanced profit.

Gula Prai, a refined sugar product brand dominates the domestic market with a 60% share. This is the flagship brand of MSM Malaysia Holdings Berhad (MSM), Malaysia's leading sugar producer. MSM is FGV's 51% owned subsidiary.

FGV Integrated Farming Holdings marks our foray into food production, which has grown by leaps and bounds. Bolstered by our agricultural experience, this sector has ventured into fruits, dairy and rice. The venture provides an avenue for equitable growth as it leverages local contract farmers and simultaneously contributes to the country's food security goals.

Continuously expanding to meet ever-growing demands, our Logistics & Support Businesses Sector drives group-wide efficiency. Vertical integration of the Group's core businesses connects and directs the flow of assets to better outcomes. The Group owns and operates one of the biggest bulking and storage facilities for vegetables and edible oils.

## Sustainability in FGV

We believe that in order to be better, our core must be unshakeable. We know that sustainability makes for a strong core, so FGV holds tight to our principles of sustainable and responsible development. Our Group Sustainability Framework outlines three pillars; namely promoting economic growth, respecting human rights and protecting the environment. We promote and embrace sustainability in our operations through various focus areas including responsible sourcing, traceability, addressing climate change and much more.

## Our Pledge

Some of our pledges include:

- No Deforestation, No Planting on Peat and No Exploitation (NDPE)
- To contribute to the achievement of the 17 United Nations Sustainable Development Goals (SDGs)
- Internationally-recognised human rights principles and standards stemming from the Universal Declaration of Human Rights (UDHR) and other international human rights instruments
- FGV draws on the United Nations Guiding Principles on Business and Human Rights (UNGPs), the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and other relevant ILO conventions.

# Our Products

## Taste The Excellence of FGV Edible Consumer Products and Fresh Produce

We strive to be the very best. FGV Group aims to be the number one food and integrated agribusiness company in the world. Our efforts are reflected in the quality of our edible consumer products and fresh produce loved by consumers around the globe. Through our subsidiaries, Delima Oil Products Sdn Bhd (DOP), MSM Malaysia Holdings Berhad (MSM), FGV Integrated Farming Holdings Sdn Bhd (FGVIF) and FGV Dairy Farm Sdn Bhd (FGVDF), we offer the finest food products, the pride of all Malaysians.

With a strong portfolio of brands that have found its way into the hearts of consumers, FGV's subsidiary, DOP has secured a foothold in key markets in ASEAN, Middle East, West Asia, Europe and West Africa. Under SAJI and ADELA, DOP offers a comprehensive range of quality products that have warmed the hearts of countless households. Perfect for every occasion, SAJI, ADELA and Gula Prai products are the heart of every meal, turning ordinary meals into a masterpiece.

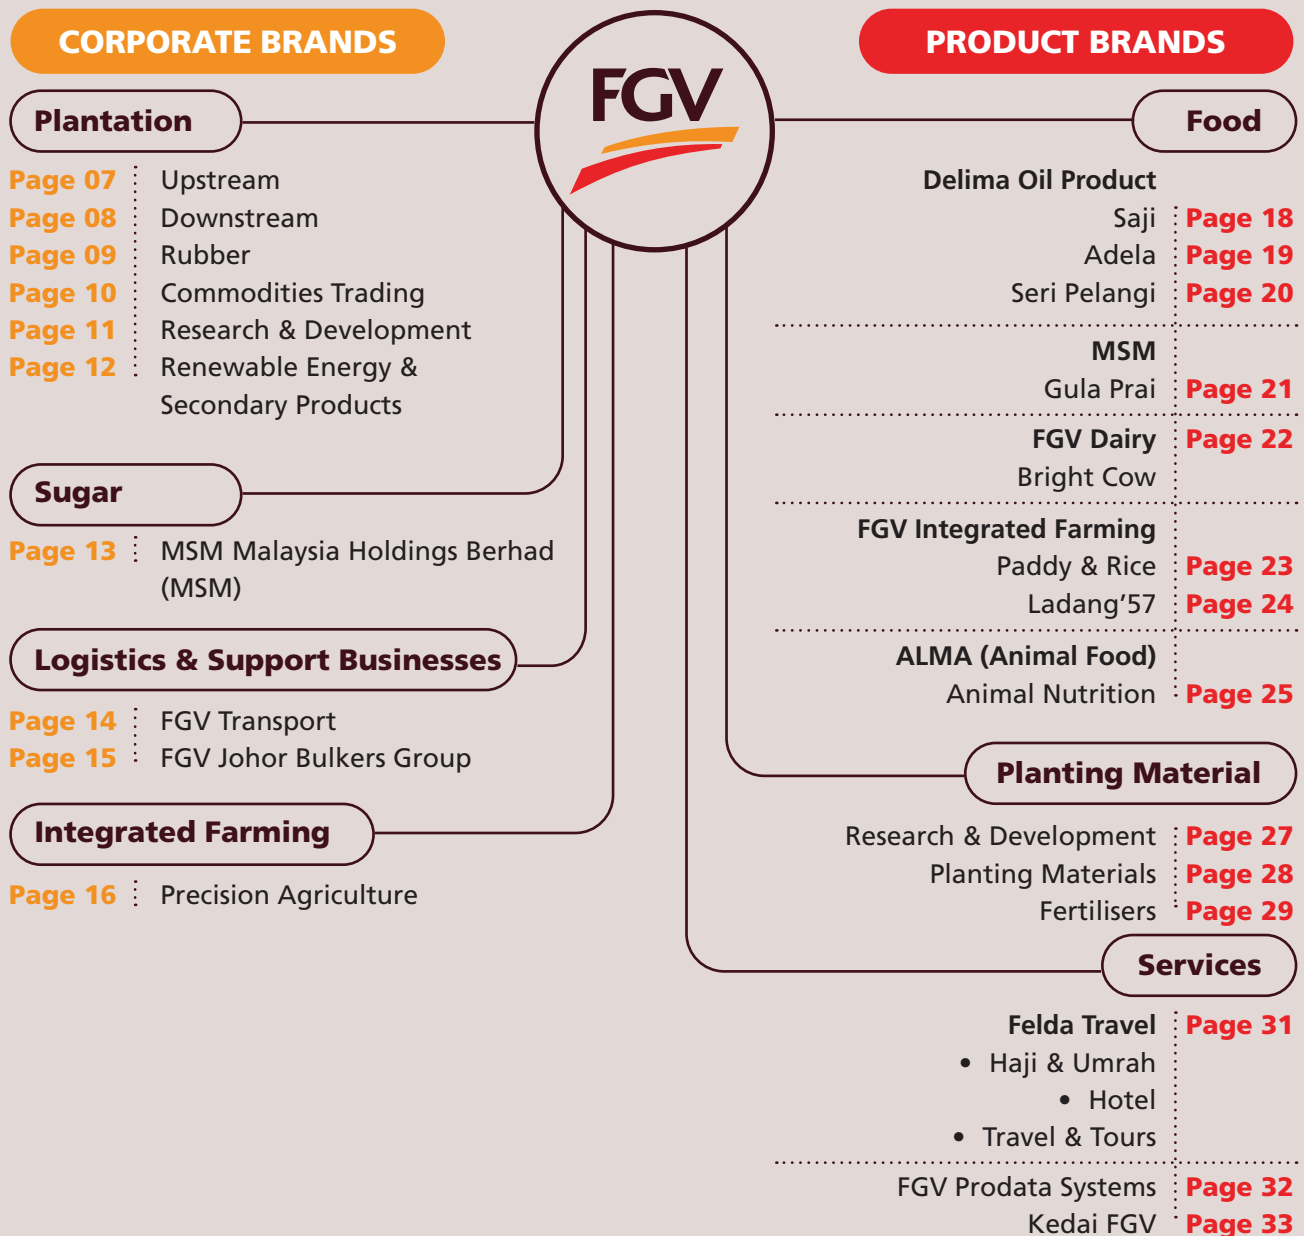

Through FGVIF, we showcase our farming experience and philosophy, putting out the freshest and most nutritious produce on the market. Our Ladang'57 brand offers the most delicious MD2 pineapples and Cavendish bananas. Each fruit we put out is carefully picked and packed for maximum freshness. For all things dairy, our Bright Cow brand has made its way into the hearts of consumers. More than just milk, our expanding product line-up includes yogurt, fermented dairy products and fresh cheese. Taste happiness in every bite. Experience the very best Malaysia has to offer and taste the excellence.

# Business Overview

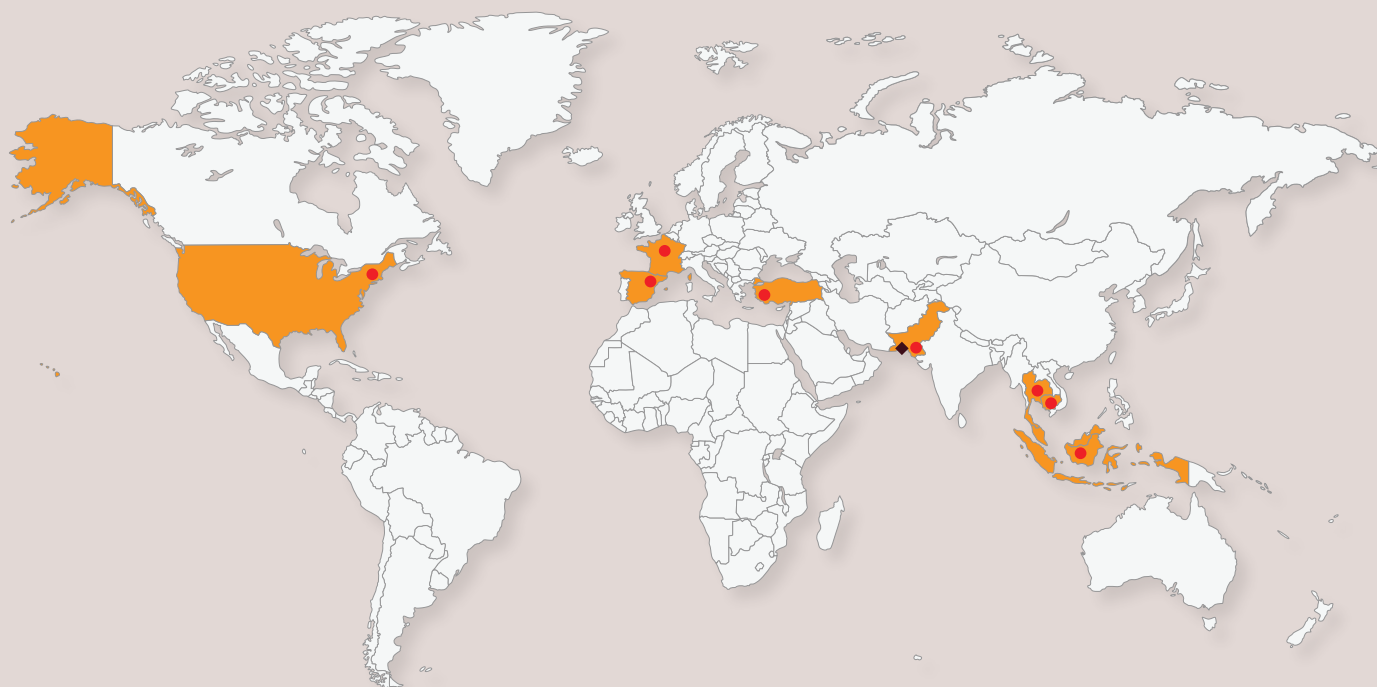

Although we are primarily known as the world's largest producer of Crude Palm Oil (CPO), FGV's business interests are not limited to the plantation sector. To put out the best products, we believe it is crucial for us to leverage synergies in adjacent sectors as well as establish a presence in certain sectors to optimise our performance.

Furthermore, FGV's strategic presence in these sectors facilitates its sustainability objectives through the implementation of waste-to-wealth initiatives and other synergies.

# Research & Development

FGV's Research & Development (R&D) Division has over five decades of expertise towards becoming a front-runner in oil palm research, which has culminated in our research stations; Pusat Penyelidikan Pertanian Tun Razak (PPPTR) in Jerantut, Pahang and FGV Innovation Centre (FGVIC) in Bandar Enstek, Negeri Sembilan which is one of the largest Biotechnology Centres in South East Asia.

We focus on technology development and provide cutting-edge technology that covers the entire supply chain to improve yields, milling processes and customised downstream products. We are the industry leader in the production and supply of high quality oil palm planting materials such as FGV Yangambi ML161 in the Malaysian market, making us the largest producer of oil palm seeds in Malaysia with an annual production of 30 million seeds.

Additionally, we produce and distribute fertilisers to both domestic and international markets.

## OUR RESEARCH AREAS

- Oil Palm Breeding & Genomics
- Tissue Culture
- Agronomy & Strategic Crops
- Crop Protection & Biosolution
- Precision Agriculture
- Food Technology
- Feed & Industrial Technology

# Renewable Energy & Secondary Products

## Waste not, want not. FGV takes waste-to-wealth pathway to profit

Drawing from our experience in renewable energy spanning over 20 years, sustainability is part of FGV's philosophy. Our position as the global industry leader in sustainability is reflected in our actions, as we are the plantation company with the most biogas plants and renewable initiatives. Through our waste-to-wealth initiatives, our plants generate consistent and reliable supply of electricity for the national grid, powering homes and businesses of our neighbours. FGV helps provide electricity to communities in rural areas that do not have access to reliable energy supply compared to more well developed areas, and we use our waste to do so.

### RENEWABLE ENERGY

## 28 Biogas plants

- 1 BioCNG plant
- 11 Biogas plants for national grid
- 3 Biogas plants for rural electrification
- 13 Biogas for POME treatment
- 4 Composting plants
- 12.5 MW EFB Power Plant for national grid
- 7.5MW EFB Power Plant
- Electricity and steam for refinery
- Electricity for kernel crushing plant
- Electricity for township
- Steam supply for Sahabat, Sabah bulking facility

## Taking the holistic approach

Taking it to the next level, we optimise by-products from our palm oil processes by turning it into secondary products. Production of crude palm oil and palm kernel results in sludge palm oil, mesocarp fibre, palm kernel shell and empty fruit bunches, with our waste-to-wealth initiatives, these by-products are given second life in the form of various products. At FGV, we utilise palm oil secondary products in the principal manufacturing of products such as soaps, animal feeds and bio-fuels, among others. Secondary products from palm oil have found a wide application in the manufacture of candles, cosmetics, toiletries, and pharmaceutical products.

### SECONDARY PRODUCTS

- Bunch Ash
- Sludge Palm Oil (SPO)
- Empty Fruit Bunch (EFB)
- Palm Kernel Shell (PKS)
- Scrap iron
- Palm mesocarp fibre
- Shredded empty fruit bunch
- Scum oil
- Decanter cake
- EFB compost
- Fortified organic fertiliser
- Black soil
- Solids

# MSM Malaysia Holdings Berhad

FGV's Sugar Sector operates mainly through its 51% owned listed subsidiary, MSM Malaysia Holdings Berhad (MSM). MSM is Malaysia's leading refined sugar producer and one of the biggest sugar refiners in Asia. MSM is involved in producing, marketing and selling refined sugar products under the flagship brand, Gula Prai.

The products include the high quality PXX sugar for industrial customers and various grades of refined sugar for the consumers which include coarse grain, fine granulated, soft brown, icing and caster including premium sugar mixes with sucralose or stevia. MSM also offers molasses, a by-product of the refining process, to distilleries and producers of ethanol, animal feed and yeast, among other products.

100% of raw sugar in Gula Prai brand products are sourced from Wilmar's NDPE Sugar Initiative. The NDPE (No Deforestation and No People Exploitation) Sugar Initiative's ambition is to make sugarcane production environmentally sustainable and to improve the livelihoods of the people involved.

# Logistics & Support Businesses Sector

FGV's Logistics & Support Businesses (LSB) Sector reinforces our core business by connecting and controlling the flow of assets to drive group-wide efficiencies by providing services in bulking/storage and transport facilities as well as other support businesses such as Information & Technology (ICT) and Hospitality. This Sector assists in enhancing FGV's performance and driving improvements in our business activities, in line with our strategic goal to grow our business in adjacent fields. FGV aims to be a total integrated Third-Party Logistics (3PL) solution provider and full-fledged ICT player in the domestic market.

**LSB possesses one of the world's  
largest edible oil storage facilities**

# FGV Johor Bulkers Group

**One of the largest vegetable  
oil terminals in the world**

1. A one-stop independent centre for storage and handling of various products in all major ports in Malaysia.
2. We have handled vegetable oils, oleochemicals, biodiesel, renewable energy feedstocks, Palm Kernel Expellers (PKE), Palm Kernel Shells (PKS) and grains via vessels, road tankers and pipelines in all major ports including Pasir Gudang, Tanjung Langsat, Port Klang, Kuantan, Lahad Datu and Sahabat in Malaysia.

Annual throughput of over  
**9 MILLION MT**  
for vegetable oils and expellers/grains

Total liquid storage capacity of  
over  
**900,000 MT**

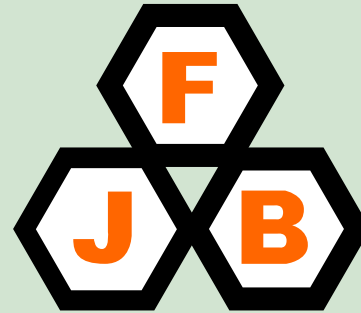

Total warehouse storage capacity of  
**123,000 MT**

Catering to:

- Palm Kernel Expellers (PKE)
- Palm Kernel Shells (PKS)
- Grains

We are equipped with supporting facilities for moving products via:

- Road tankers
- Vessels
- Pipelines
- Isotainers
- Flexi bags

## Our services are accredited with:

- ISO 9001 (Quality Management)
  - ISO 22000 (Food Safety)
  - ISO 14001 (Environment)
  - OHSAS 18001 (Safety)
  - ISO/IEC 17025 (Laboratory)
  - ISCC (Carbon Control)
  - GMP+ B3 (Warehouse)
  - Certified with Halalan-Toyyiban and KOSHER
3. We are equipped with supporting facilities for moving products via road tankers, vessels, pipelines, isotainers and flexi bags.
  4. We have 24-hours dedicated and continuous Nitrogen gas supply for blanketing and sparging purposes.
  5. We have a computer-controlled individual tank level and automatic temperature heating system to ensure accurate quantity and quality control of product in every storage tank.
  6. We have stirrers in all tanks, facilitating product homogeneity and ensuring complete tank and product empty out.
  7. We have surpassed the 80% mark in customer satisfaction surveys for five consecutive years.
  8. Most of our tanks are fully customs bonded and we have transshipment facilities supported and coordinated by a competent internal forwarding team.
  9. We are an approved Port Tank Installation owner for physical storage for CPO, CPKO and RBD Olein to support Future Trading under Bursa Malaysia.

# FGV Integrated Farming Holdings Sdn Bhd

## Transforming farming into a virtuous cycle

Integrated farming is the blueprint to propel agricultural practices into the future by capitalising on the existing synergies in FGV's extensive palm oil operations. The practice is bolstered by technology and digitalisation in the form of precision farming to improve yields.

The inclusion of cash crops and rice along with animal nutrition, livestock and dairy farms leverages FGV's palm oil-based synergies into a functioning circular economy. In turn, this model optimises our production, lowering the cost as well as environmental impact.

Success of our integrated farming projects will serve as a blueprint so the practice can be replicated by local farmers and contract farmers alike, supported by the innovative agricultural services offered by FGV.

Furthermore, our integrated farming business contributes to Malaysia's food security goals, directly via food production and indirectly via opportunity for more locals venturing into agriculture.

# OUR FOOD BRANDS

## Sugar, spice, everything nice

Delicious and sustainable, experience the indulgence of our food products.

# Saji

Local cuisine needs insider knowledge. Made especially for local taste buds, Saji is your perfect kitchen companion for your adventures in traditional recipes. With a wide range of products, from sauces, cooking oil, coconut milk and more, we got it covered. Come together like a family with Saji.

# Adela

Incite your passion. Your baking and cooking companion for a wonderful gastronomic journey. For those looking to expand their culinary horizons, Adela offers a wide range of options to tackle even the most daunting recipes. Make no compromise, choose products that are cholesterol-free, enriched with essential vitamins. Bring hearts closer with Adela.

Seri  
**PELANGI**

## Seri Pelangi

Versatile, aromatic and delicious, everybody's favourite margarine. Seri Pelangi's margarine is perfect for any application. Spread it on toast, use it in baking, or use it however you like. Made from high quality palm oil, add an aromatic touch to your dishes with Seri Pelangi.

# Gula Prai

To make everything sweet. With more than 60 years of experience, Gula Prai has seen it all; from the needs of household kitchens to meeting industrial demands. Our diverse product range reflects the breadth and depth of our business with various grades of refined sugars, molasses and sugar, sucralose and stevia mixes. We are here to satisfy your cravings.

# GULA PRAI

# Bright Cow

## Fresher than lightspeed

From sunlight, fresh grass, and pure water, to a creamy bottle of delicious milk. After homogenisation and pasteurisation, fresh milk from Bright Cow is placed on store shelves near you, mere hours later.

A premium local dairy line of milk, yoghurt, cheeses and kefir that comes from our farm in Linggi, Negeri Sembilan. If we had to describe it to you, it is simply, tastes of freshness.

# Paddy & Rice – Fortified Field

Fortified Field™, is the fruits of FGV Integrated Farming's efforts in line with the Malaysian government's initiative to modernise the domestic rice industry through innovation.

To do so, we aim to forge a strategic partnership with farmers and relevant agencies to develop and promote the production of a special variety of paddy & rice starting with local fragrant rice for local and global consumption.

Our sweat and tears culminated in the development of the MRQ76 fragrant rice which is harvested from our Fortified Field™ in Seberang Perak and Northwest of Selangor. This rice has a slightly glutinous texture with a fragrant pandan aroma. The long grained MRQ76 is a perfect fit to be a staple in any Southeast Asian cuisine.

In our effort to modernise the industry, FGV is developing a comprehensive rice farming system. It incorporates the most efficient processes and best practices for paddy farming which will result in a high yield paddy – Fortified Field™ System.

# Ladang'57

## Happiness celebrated

Ladang'57 and Malaysians go way back. Since 1957, in fact. As our nation has grown and prospered, we've been right there nourishing and cultivating for each generation.

Malaysian farmers, growing the fruits that we all love, tending to our roots and our heritage. They bring artisanal expertise with a commitment to growth for us all.

# Animal Nutrition

## Nourish the food chain at the source

Formulated for good health and sustainability, our range of animal feed is made out of the best ingredients and meets the highest standards. Being farmers ourselves, ALMA prioritises growth development, healthy immune systems and good reproductive health.

Our plant-based products are antibiotic-free and specially fortified with vitamins and minerals crucial for raising healthy animals. The animal nutrition products also serve as a mean to bolster Malaysia's food security by reducing dependence on imports.

# ALMA

# AGRI PRODUCTS

## The right start for the best results

In farming, there are countless variables at play in determining the end result. For the greatest yield, it is crucial to start with the absolute best. The right seed yields the best fruit.

# R&D Advisory And Services

## Optimising value

Innovation is a cornerstone of FGV's DNA, tracing back to the establishment of the Tun Razak Agricultural Research and Development Centre in 1972. Since then, we have continued to pursue breakthroughs to maximise our results and help others to do the same with our advisory & services offerings:
